PRESTO PRO

Innovative processor/stainer
for frozen sections of permanent-like quality

www.milestonemed.com

THE PRESTO TECHNOLOGY: PRESTO PRO

The goal of frozen sections permanent-like quality can be achieved by combining the advanced cryoembedding technology of the **Presto CHILL** unit, with the performance of the **PRESTO PRO** automatic processor/stainer.

From fresh biospecimens to six stained frozen sections of permanent-like quality in less than **10 minutes**.

Human breast
40x

Human liver
40x

Human lung

Human lymphnode
20x

THE FINAL STEP TOWARDS FROZEN SECTIONS OF PERMANENT-LIKE QUALITY

Conventional frozen sections provide a short turnaround time of 15-20 minutes, but with the disadvantage of a lower diagnostic quality with respect to paraffin sections due to cryoembedding artifacts and the variability of staining protocols. One of the main reasons for their lower quality, versus a FFPE section, is that frozen sections are only stained while FFPE sections are first processed (fixation + dehydration + clearing) and subsequently stained. It is now possible to produce frozen sections with a permanent-like quality by combining the artifact-free freezing of tissues of the PrestoChill unit with the outstanding features of the all-new **PRESTO PRO** processing/staining unit. **PRESTO PRO** is an innovative benchtop processor/stainer for high-quality frozen sections. It features a standardized approach to **processing the slide** with FineFIX (*European Patent EP 1455174B1 - US patent US 20050074422*), a patented Milestone solution, followed by fully automated staining protocols.

The new PRESTO PRO processor/stainer

NO COMPARISON WITH AN AUTOMATIC CONVENTIONAL OR MANUAL STAINER

- ▶ PRESTO PRO is a **slide processor** combined with an automated stainer.
- ▶ Standardized, optimized staining results are obtained **independently from the operator's skills**.
- ▶ The **fully programmable protocols** fit every tissue and/or pathologist's requirement.
- ▶ The reagents can be **totally managed and controlled**.
- ▶ It is an **open system**. Besides FineFIX, all the other reagents used are your own reagents.
- ▶ It is safe: **xylene is not required**. Isopropanol is its substitute.
- ▶ A fully **downloadable documentation** is available for each run.

THE UNIQUE PROCESSING/STAINING SETUP OF THE PRESTO PRO

SIMPLE. INTUITIVE OPERATION MAKES EVERYONE AN EXPERT

1 Position the slide rack over the FineFIX processing vessel.

2 Close the cover.

3 Press START.

4 After 2'17" in high quality mode (in 3'51" in ultra-quality mode) six slides are processed/stained, ready for coverslipping and examination.

NEW FEATURE: PRESTO PRO WITH CONTINUOUS LOADING

A new feature to increase throughput for high volume frozen sections labs. Simply install a double arm to the PRESTO PRO carousel and the unit is ready for operation. Loading of a new rack can start every 1'45".

1 Select "Continuous Loading".

2 Load first rack in FineFIX container.

3 After 1'45" load the second rack in the FineFIX container.

4 After 2'17" the first rack is ready for coverslipping.

5 After 4' from the start of the first rack, the second rack is ready for coverslipping.

CHECK FOR BEST
OPERATING PROCEDURES
FOR SPECIAL APPLICATIONS

FULLY AUTOMATED PROCESSING PLUS STAINING TIMES FOR 6 SLIDES

SINGLE ARM

High quality protocol: **2'17"** for six slides
High quality throughput: **144** slides/hour
(average of 5 minutes for 12 slides = 144 slides every 60 minutes)

Ultra quality protocol: **3'50"** for six slides
Ultra quality throughput: **90** slides/hour
(average of 8 minutes for 12 slides = 90 slides every 60 minutes)

HIGH-QUALITY
PROTOCOL

ULTRA-QUALITY
PROTOCOL

DOUBLE ARM CONTINUOUS MODE LOADING

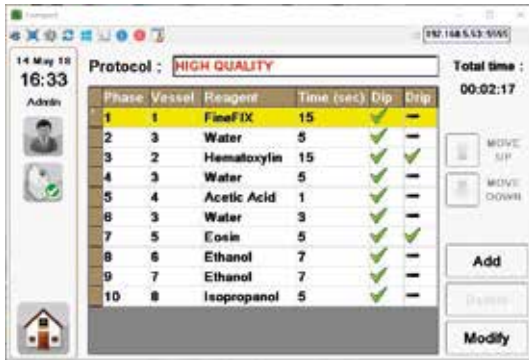

High quality protocol: **2'20"** for six slides
High quality throughput: **190** slides/hour
(average of 18'30" for 60 slides = 194 slides every 60 minutes)

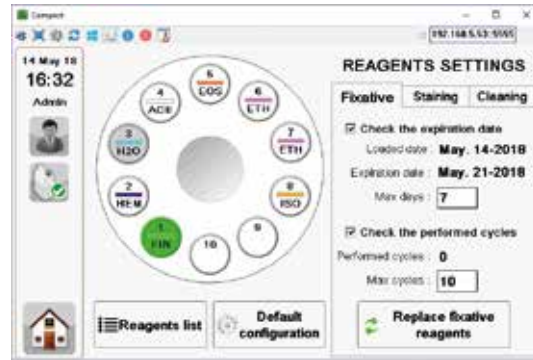

CONTINUOUS MODE
HIGH-QUALITY PROTOCOL

■ FIRST RACK ■ SECOND RACK

EASILY OPERATED

The operator can easily set protocols to fit lab's requirements.

User-friendly intuitive software.

TECHNICAL SPECIFICATIONS

- Processor/Stainer for up to 6 slides
- 4,3" touchscreen terminal, 1 USB port
- Weight: 42Kg (92.6 lbs)
- Power supply: 230V~ 50/60Hz or 115V~ 60Hz (180W)
- Dimensions:
 Height: 61,5 cm (24.2") (with opened cover 86 cm / 33.8")
 Width: 44 cm (17.3")
 Depth: 52,5 cm (20.6")
